

WE ARE SEEKING YOUR FEEDBACK

Graham County Housing Plan

This project, funded by a grant from the United Way of Graham & Greenlee Counties, is being prepared by the consultant group of Grow America and Norris Design, with assistance from the Southeastern Arizona Governments Organization (SEAGO).

Housing – SEAGO and the United Way of Graham & Greenlee Counties need your help in developing a market study, strategy, and implementation plan for increasing the amount of housing in the County. The strategy produced will be aimed at attracting a variety of developers to Graham County, including those involved in workforce, single and multi-family, and affordable housing. The project will result in the selection of at least two preferred sites for new developments, and will provide a framework for those developments. To guide these efforts, the housing strategy consultant team will first prepare a housing market study to analyze local trends and economic conditions, and assess pertinent infrastructure. This survey will help our team determine priorities for development, while taking community stakeholder feedback into account.
